

The Anti-Fishing Security handle prevents criminals from gaining entry to a facility through the method known as 'fishing'. The right angle design of the handle prevents wires or alike tools from being hooked on to the handle and pulled down (fishing) and retract the bolt. For environments that are exposed and are likely to be targeted by criminals, the Anti-Fishing handle is the perfect security locking system accompaniment.

ANTI-FISHING HANDLE WITH SHROUD

FEATURES

- Stainless steel finish provides a modern appearance and durability in all-weather environments
- Unique right-angle design of the handle
- Internal handle protection shroud option available

BENEFITS

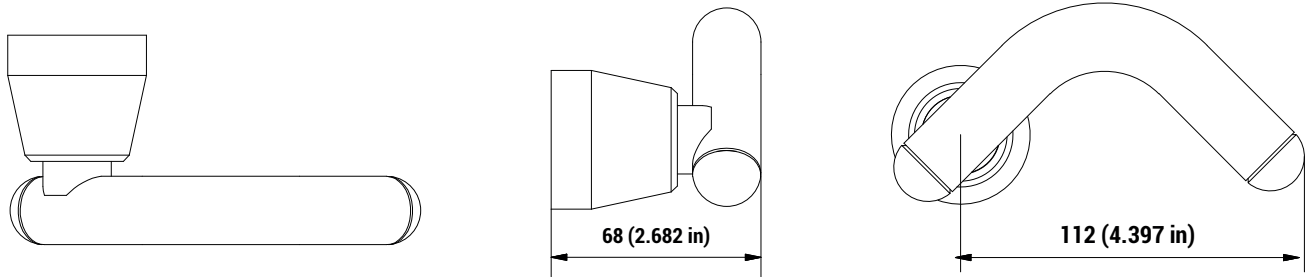

- Can be used in conjunction with a range of locking systems such as our multi-point Moorgate lock or the single point Purbrook GT lock to provide a fully functional physical security system
- Prevents intentional fishing attempts
- Ideal solution for gates where handles may be vulnerable

PRODUCT PERFORMANCE CHART

☐ Indicates product has been certified, or tested & approved as part of a complete doorset assembly.
Product certification is subject to the chosen lock configuration, for full details please contact the sales office.
