

Folded stainless steel plates, known as 'packers', can be provided for instances where architectural components of a doorset may be obstructive to the bolts. The packers move the bolting points of a locking system away from the door surface to ensure secure bolting where seals, ballistic 'bullet catchers' or other door architecture may hinder this.

FEATURES

- Manufactured from complete 316 stainless steel
- Specified to suit each individual locking system
- Available from 5mm (standard) to 25mm (B25)
- Pre-prepared to suit Slimline fixing positions
- Robust construction and design

BENEFITS

- Allows for the movement of bolting positions without compromising door aesthetic
- Long lasting design and material construction
- Suitable for all Slimline locking systems

ORDERING CODES

Stainless steel packers have a simple ordering code that covers the chosen mounting method, cylinder profile, cylinder protection and handing configuration.

EXAMPLE ORDER CODE: PSL-B08

MODEL	SYSTEM		PACKER THICKNESS	
P	SL	Slimline	B08	8mm
			B10	10mm
			B15	15mm
			B20	20mm
			B25	25mm
