

The high-security Door Scope provides a view and awareness of pedestrians and potential threats on the other side of your door or wall. It has been tested and certified to several international standards for reliable resistance against forced entry and ballistic attacks. The high-security Door Scope is supplied as a pre-assembled package for fast and easy installation. With a design that is suitable for varying door and wall thicknesses, it is the perfect additional feature for high-security locations.

FEATURES:

- Brushed stainless steel construction as standard
- Suitable for internal and external applications
- Adjustable to suit various door and panel thicknesses
- 75 degree viewing angle

TECHNICAL DRAWINGS

SELF-CODING SYSTEM

The Door Scope (DS) has a simple ordering code that covers security ratings and door dimensions.

The device is easy to specify:

Step 1. Security Rating

Step 2. Ballistic Protection

Step 3. Fire Ratings

Step 4. Clear Vision Diameter

Step 5. Door Thickness
